

Always be safe online!

Internet Safety!

The internet can be a great place to learn new things and talk to people you can't see in real life, but you need to be careful. If you don't pay attention there can be real dangers especially on social media.

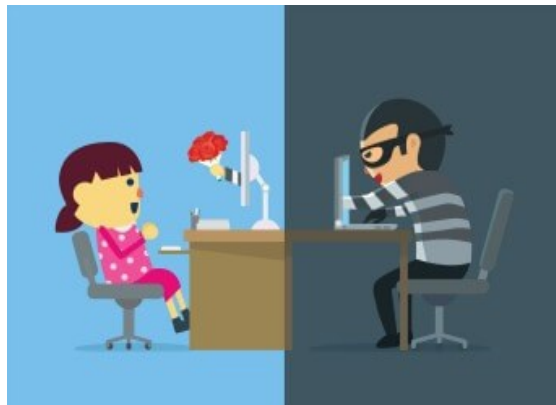

So what can you do to protect yourself online?

Tip 1: Stranger Danger!

Just like in real life, you should never talk to people you don't know online. Sometimes people lie about who they really are online, so make sure to only talk to people who you know are telling the truth.

Tip 2: Don't share per- sonal infor- mation!

If someone online ever asks you to share personal information such as your phone number or your address always say no! If a website asks you for this information ask your parents whether or not you should do it before you agree.

Tip 3: Always tell your parents!

Never keep your internet browsing secret from your parents. They need to know what your doing online and with who. This way they can help you avoid dangers you might not even know exist!
