Nayef Francis
The Economist

"Nayef Francis' work looks like simple furniture that's what the furniture designer wants you to think. "The real skill is to develop a response that makes the most sophisticated design process end in the simplest outcome," explains the 49-year-old. By creating work that is visually unostentatious and unassuming, Francis' design process is not the focus of the object, but instead the function. The most recent work was created for a well-known exhibition at Citic in Dubai this summer, titled 'The More, the Merrier'. Regard: Each piece was aimed at incorporating the traditional motifs reserved for so many people, and certainly UAE residents, in today's world.

The result? Minimal furniture and home items that can be modified and maintained, depending on the space and purpose, by the user themselves. For instance, the 'Wood dining table' placed on top of four supports which double as cushions. "It always try to repeat a design in a different way."
