Week 45: Laurus nobilis, commonly known as the bay laurel or sweet bay, belongs to the family Lauraceae. This family includes aromatic evergreen trees and shrubs, many of which are native to regions in the Mediterranean, such as Southern Europe, North Africa, and parts of Asia. It thrives in a Mediterranean climate, characterized by hot, dry summers and mild, wet winters. It has aromatic leaves emitting a distinctive fragrance when crushed. In addition to having medicinal properties, the leaves are used as a culinary herb to add flavor to various dishes. The Laurel is a symbol of victory in ancient Greece and Rome, the bay laurel, was used to crown victorious athletes, warriors, and scholars. The term "baccalaureate" is derived from the Latin words "bacca" (berry) and "laureus" (laurel), and it originally referred to a crown made of laurel berries, given as a mark of honor.

As part of the school's 150th-anniversary celebrations, the curator of Brummana High School Botanical Garden will dedicate a section of our weekly bulletin to highlight 150 plants currently flourishing on our campus. Every week, one plant will be profiled for its scientific and cultural significance. Our ultimate goal is to shed some light on the rich and diverse plant collection present on our campus, because, as the legendary naturalist Lord David Attenborough once said, "No one will protect what they don't care about; and no one will care about what they have never experienced."

The second graders were filled with enthusiasm as they gathered for Mrs. Shatha's "Healthy Assembly." The assembly is part of the PSHE curriculum, which focuses on personal safety and well-being and other essential life skills. At the end of the assembly, the "Student of the Week" awards were distributed.
